

SHAPING the future **BIOeconomy**

across
sectoral,
geographical and
governmental
levels

ShapingBio

ShapingBio

**Support and accelerate
the deployment of
bioeconomy innovation
in the EU**

CHALLENGE:
**Uptake of
innovation in
the bioeconomy
sector**

CHALLENGE:
**Limited cross-
sectoral exchange
and collaboration**

CHALLENGE:
**Scattered and
partly incoherent
public funding
and regulation
across ministries and
geographical levels**

Across EU-macroregions
and different sectors:

ACTIVITY: Map and analyse initiatives, structures, policy instruments and key gaps related to:

- policy and governance
- applied R&D and tech transfer
- collaboration
- financing

ACTIVITY: Reach out to **Quadruple Helix Stakeholders** (science, industry, policy, society)

ACTIVITY: Organise **Dedicated Stakeholder Workshops**

OUTCOMES/ RESULTS:

Recommendations for better policy alignment and stakeholder actions to realize the cross-sectoral potential of the bioeconomy and to reduce the fragmentation across biobased sectors and policies across regions, domains and governance levels.

ShapingBio

GAIN: The circular bioeconomy contributes to societal challenges such as climate change, substitution of fuel resources and industry 5.0

PROJECT DURATION

1st September 2022 – 31st August 2025
